

# Base HOLOGRAFIX™ OCTOBER 2001

Decorative Specialty Film

Base Material - Non PSA

## DESCRIPTION:

HOLOGRAFIX™ is a unique family of decorative patterns that are embossed onto polyester film. The film is metallized to bring out a bright, vibrant, multi-dimensional pattern. HOLOGRAFIX™ film can be color tinted and pressure sensitive coated for a variety of applications. GRAFIX® stocks a number of pattern/color/pressure sensitive combinations. Custom color/pressure sensitive configurations are available. Because our holographic film is made of polyester, it is durable, dimensionally-stable, acid free, contains no plasticizers, and is water proof. Our base HOLOGRAFIX™ film can be laminated, die-cut, screen printed, and further fabricated... your imagination is the limit!

## Options
